

Family engagement is an interactive process through which staff and families, family members, and their children build positive and goal-oriented relationships. It is a shared responsibility of families and professionals that requires mutual respect for the roles and strengths each has to offer. Family engagement means doing with—not doing to or for—families. In community engagement efforts DEI plays a vital role.

Diversity, equity, and inclusion — commonly referred to as DEI — has taken center stage in our PTA practices. PTA leaders must actively work to create meaningful change in spite of the history of injustice that has marginalized underrepresented groups within the community.
